Overview: Conduct engineering services and project support planning for Commander, Navy Expeditionary Combat Command (NECC) and NECC Pacific (NECCPAC). Provide experimentation planning and analysis to the NECC/NECCPAC and United States Fleet Forces Command Fleet Experimentation planning and coordination processes, support Navy Expeditionary Combat Enterprise (NECE) initiatives to amend and revise identified Department of Defense (DoD) processes providing analytical tools to streamline standard methods and practices to reflect current operational demands.

Place of Performance: Joint Expeditionary Base Little Creek – Fort Story, VA.

Expected Level of Effort: 1920 hours

Description:

Relies on extensive experience and judgment to plan and carry out goals. Manages projects to expand participation and anticipates customer needs. Directs tactical activities of the program including, but not limited to, engineering, finance and/or operations. Leads and directs the work of others. Responsible for formulating and enforcing work standards, assigning contractor schedules, reviewing work discrepancies, supervising personnel and communicating policies, purposes, and goals of the organization to team. Responsible for the overall contract performance and shall not serve in any other role under this contract.

Education: Bachelor's Degree, in a relevant management discipline

Specific Qualifications:

- Over 12 years of experience in Navy Expeditionary or DOD systems.
- Familiar with a variety of engineering concepts, practices, and procedures.
- Able to work with all phases of the development life cycle as well as obtaining increasing levels of management experience.
- Technical experience shall include Navy/military engineering disciplines, systems, products, or field of study applicable to the assigned task/project.
- U.S. Citizen

Security Clearance: SECRET
